

POC

Juno Genetics offers a test that sheds light on the cause of miscarriage

Juno Genetics offers a test that assesses cells from the embryo/fetus or associated extraembryonic tissues.

Testing of POC potentially provides useful information for any couples who have experienced a pregnancy loss, but may be particularly valuable for those with any of the following: a history of several miscarriages; an abnormal ultrasound prior to a lost pregnancy; a fetus affected by intrauterine growth retardation; an abnormal prenatal test result; a pregnancy loss after IVF.

BEST-IN-CLASS ACCURACY

Results obtained from 99% of samples.

FASTER

Results provided within 7-10 days

Benefits of POC testing

- Results obtained from 99% of samples.
- All chromosomes tested.
- High resolution (duplications and deletions >18Mb).
- Triploidy detected.
- DNA fingerprinting to avoid errors.
- Advanced sequencing to count chromosomes.
- Suitable for twin pregnancies.
